## 1. Executive Summary

Summarize requirement understanding, proposed outcome, differentiators, assumptions, and key risks.

## 2. Understanding of Requirements

Map major RFP requirements to your response; identify exceptions, dependencies, and unanswered items.

## 3. Proposed Solution & Technical Capability

Describe architecture, integrations, data flows, scalability, resilience, deployment, technical assumptions, and fit.

## 4. Implementation Plan

Provide phases, milestones, deliverables, schedule, dependencies, acceptance criteria, staffing, governance, and risk mitigation.

## 5. Team & Governance

List key roles, allocation, decision rights, escalation path, and project cadence.

## 6. Commercial Proposal

Itemize one-time and recurring charges, currency, taxes, optional items, payment milestones, support, licenses, assumptions, exclusions, and total cost.

## 7. Security, Privacy & Compliance

Describe access controls, encryption, audit logs, incident response, backup/DR, retention/deletion, secure development, and only certifications actually held.

## 8. Risks, Assumptions & Dependencies

List risk, likelihood, impact, mitigation, owner, and residual risk.

## 9. Support & Service Levels

Define support hours, channels, severity, response/resolution targets, escalation, reporting, maintenance, warranty, and post-go-live coverage.

## 10. Relevant Experience & References

Describe comparable projects, dates, scope, outcomes, technology, and reference status; distinguish verified references from illustrative examples.

## 11. Exceptions & Missing Items

List deviations, unanswered requirements, exclusions, and clarifications. Write None only after checking all requirements.

## 12. Evidence Register / Appendices

Map claims to supporting documents and page numbers; attach architecture, security evidence, sample deliverables, and references.
